

Sewer Cleaning/Lining Notice

Dear Resident,

Broward County has contracted Miller Pipeline to perform sanitary sewer rehabilitation services. This process involves using high pressure water to remove any debris from inside the sewer main and periodic closure of your service when rehab is taking place. The cleaning process will be done from the street and no access to your homes is required at this time. We ask that on the date below you limit your water usage for the day (such as washing clothes, dishes, etc.). We also recommend that on the date below you close the toilet lids in all bathrooms while these services are being performed. If you have any questions regarding this work please contact our Project Manager, Matthew Callahan at 301-481-9011. If you do not get a response within 10 minutes, please email him at matt.callahan@millerpipeline.com.

Since this is construction work, weather and other issues could arise that could delay or expedite our arrival to your street. In addition, some homes in your area have several sewer laterals serving your home and in some instances each sewer service is on different line segments and therefore could cause you a disruption on more than 1 day. We apologize for this and will work diligently to minimize your disruption. If you don't see large trucks in front of your home, then you are clear to use your sewer service normally. If our equipment is in front of your home or adjacent to your home then please follow the guidelines above for limiting water usage.

Date scheduled for work on your street _____
