

STORMWATER MASTER PLAN WORKSHOP

First Public Involvement Workshop

The City of Lighthouse Point is getting ready to update its Stormwater Master Plan and we want to hear from you!

Project Overview

In 2002, the City completed the Stormwater Master Plan (SWMP) with the purpose of identifying opportunities to protect surface water quality and to reduce flooding within the City. This SWMP included a Capital Improvement Plan (CIP) that addressed priority stormwater improvement projects throughout the City based on observed flooding, flood complaints, roadway conditions, traffic volumes, and hydraulic analysis. The SWMP also included the development of an Operation and Maintenance program with an annual budget to improve the condition and performance of the City's new and existing stormwater infrastructure.

Many of the projects identified in the original SWMP have either been completed or are in the planning stages-which includes several capital improvement projects, localized drainage improvements, and the implementation of the recommended Operation and Maintenance program. Those efforts have enhanced and improved the City's stormwater system and reduced flooding risk.

Now, the City is ready to update the SWMP to examine the performance of the work completed to date, examine the effectiveness of the Operation and Maintenance program, and identify prioritized capital improvement projects for

future system improvements, improved stormwater management, and water quality improvements throughout the City. This SWMP Update will also review and address impacts associated with sea level rise, resiliency, and changes in the construction industry that should be reviewed and incorporated into the budgets for the stormwater program.

What to Expect

The first public involvement workshop will be held in the City Hall to obtain input from residents. The City's Consultant will hold a presentation and be available to answer questions from the public. We encourage residents to not only provide their feedback, but to participate in this discussion.
